

The bright blue directional arrow prevents accidental reciprocal bearings and the edges are graduated for tide and boat speed. The base has a fixed grid so it is easy to plot latitude from your GPS system. Comprehensive instructions are included.

## Features

Order code 0655.32

Since 1948 Blundell Harling Ltd has manufactured and distributed an extensive range of drawing equipment, scale rules, templates and technical drawing equipment for use by technical students in further education, architects, engineers, specialist designers, draughts people, and graphic artists. This extensive experience ensures that their navigational instruments are amongst the very finest available.
